PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable and secure web applications using React, Node.js, Express.js, and PostgreSQL. Strong foundation in REST API development, authentication systems, and database design. Seeking an entry-level role to apply my technical skills and contribute to innovative projects.

EDUCATION

Full Stack Web Development

Masai School

10/2025 – 02/2026

Bengaluru (Remote)

Bachelor of Technology in Computer Science

Kakatiya University

08/2013 – 05/2017

Hanamkonda,

Telangana

SKILLS

Technical Skills — Languages: HTML, CSS, JavaScript, SQL | Databases: PostgreSQL, Firebase, Supabase | Tools: Git, GitHub, VS Code, Postman | Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, ShadCN UI, **Soft Skills** — Problem-Solving, Adaptable, Communication

PROJECTS

Social Media Scheduler - Full Stack Web Application

Tech Stack: React 19, Vite, Tailwind CSS, ShadCN UI, Node.js, Express.js, Supabase (PostgreSQL), JWT, Chart.js, Node-cron

Frontend 🔗 Backend 🔗 Live 🔗

- Built a full-stack social media scheduling dashboard with role-based access control (Admin, Manager, User).
- Implemented secure authentication using JWT and bcrypt with protected API routes and middleware authorization.
- Developed CRUD functionality for posts and campaigns with scheduling validation and status tracking (Draft, Scheduled, Published).
- Integrated analytics dashboard with bar, line, and pie charts using Chart.js to visualize engagement metrics.
- Implemented automated scheduling using node-cron for publishing posts.

Restoron – Full Stack Restaurant Reservation System

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, Supabase (PostgreSQL), Axios

Frontend 🔗 Backend 🔗 Live 🔗

- Developed a full-stack restaurant reservation system with dynamic menu display and real-time bookings.
- Built responsive frontend using React, React Router, and reusable components.
- Designed and implemented RESTful APIs using Express.js.
- Integrated Supabase (PostgreSQL) for persistent data storage.
- Implemented backend validation logic to prevent overbooking.

TimeTrack AI – Activity Logger & Analytics Dashboard 🔗

Tech Stack: HTML, CSS, JavaScript (ES6), Firebase (Auth & Realtime DB), Chart.js, Vercel

GitHub 🔗 Live 🔗

- Built a web-based time tracking application to log and analyze daily activities.
- Implemented secure authentication using Firebase Authentication (Email/Password & Google Sign-In).
- Integrated Firebase Realtime Database for real-time CRUD operations.
- Developed interactive analytics dashboards using Chart.js for category-wise insights.
- Structured application using modular ES6 architecture for scalability.
